Running the game

The Uninterrupted Kea Experience runs as a python script. Because of this, it requires the follow to be installed:

Python2.7 – download at <https://www.python.org/downloads/>

Pygame (latest) – download at <http://pygame.org/download.shtml>

Once these are installed, run the script “main.py” in the root game directory.

In Linux:

Open your terminal emulator in the game folder.

Type the following command

```
$ python2 main.py
```

Note: In some file managers you can right click main.py > open with custom command, set the command to 'python2'

In Windows:

Open the command prompt

Find where the python executable is stored.

Type:

```
<path/to/python/exe> <path/to/main.py>
```

Controls

Movement

Left: a key

Right: d key

Jump: w key

Flight

Enable flight mode: Hold right click.

Increase altitude: w key

Decrease altitude: Happens automatically under gravity

Attacks

Switch attacks

Peck attack: 1

Grab attack: 2

This is an indirect attack. It is used to pick up rocks, and drop them. Without rocks, it is useless.

Do attack: Left click

This will perform whatever attack is selected. It will also drop the rock, if you are already carrying it.
